GENERAL INFORMATIONS

Guardian is an anti-theft software for mobile phone: easy, efficient and very effective. Every time the phone is powered up, Guardian checks if the SIM card is authorized, in case the SIM card is not authorized Guardian will send a notification sms (invisible) to a chosen number, containing the number of the new inserted sim card.

COMPATIBILITY LIST

Guardian supports all the S60 3rd, s60 5th, Symbian^3, Anna, Belle devices:

Compatible NOKIA Phones:

NEW Nokia Oro	Nokia 6760 Slide	Nokia E72
NEW Nokia 500	Nokia 6788	Nokia E73 Mode
NEW Nokia 603	Nokia 6788i	Nokia E75
NEW Nokia 700	Nokia 6790 Slide	Nokia E90 Communicator
NEW Nokia 701	Nokia 6790 Surge	Nokia N71
NEW Nokia 702T	Nokia C5-00	Nokia N73
NEW Nokia 808 PureView	NEW Nokia C5-00 5MP	Nokia N75
Nokia 3250	Nokia C5-01	Nokia N76
Nokia 5228	Nokia C5-03	Nokia N77
Nokia 5230	NEW Nokia C5-04	Nokia N78
Nokia 5230 Nuron	NEW Nokia C5-05	Nokia N79
Nokia 5233	NEW Nokia C5-06	Nokia N8-00
Nokia 5250	Nokia C6-00	Nokia N80
Nokia 5320 XpressMusic	Nokia C6-01	Nokia N81
Nokia 5335	NEW Nokia C7 Astound	Nokia N81 8Gb
Nokia 5500 Sport	Nokia C7-00	Nokia N82
Nokia 5530 XpressMusic	Nokia E5-00	Nokia N85
Nokia 5630 XpressMusic	Nokia E50	Nokia N86 8MP
Nokia 5700 XpressMusic	Nokia E51	Nokia N91

INSTALLATION

If you haven't installed NOKIA PC Suite in your pc, you can download this software from: <http://europe.nokia.com/pcsuite/> install and follow the instructions.

Using Nokia PC Suite the installation of new applications on your phone will be more simple and easier.

Go to the official site <http://www.Guardian-Mobile.com/> and download the Guardian installation package.

Connect the phone to the PC, double click on the package to start the installation of Guardian, after that follow the instructions on the phone.

Alternatively, after you've downloaded Guardian installation package on your PC, you can send it to the phone using infrared or Bluetooth, in this case a new message will appear in the message inbox, you have to open it to start the installation of Guardian.

CONFIGURATION

The configuration of Guardian is easy and immediate, you just need a few minutes to configure all the parameters needed by the software.

If you want to configure immediately Guardian, please continue reading to the “Quick Configuration” paragraph.

- “*Status*”, shows if the software is enabled or disabled.
- “*Recipient*”, is the recipient number of the sms sent when a unauthorized SIM is inserted
- “*SMS Text*”, is the text sent when a non-authorized SIM is inserted
- “*Secret Code*”, this secret code is really IMPORTANT. It used to enter in Guardian or into a **protected application** and to use **remote commands**,
- “*Lock Phone*”, it is possible to Automatically Lock the Phone on Sim Change or on Switch On

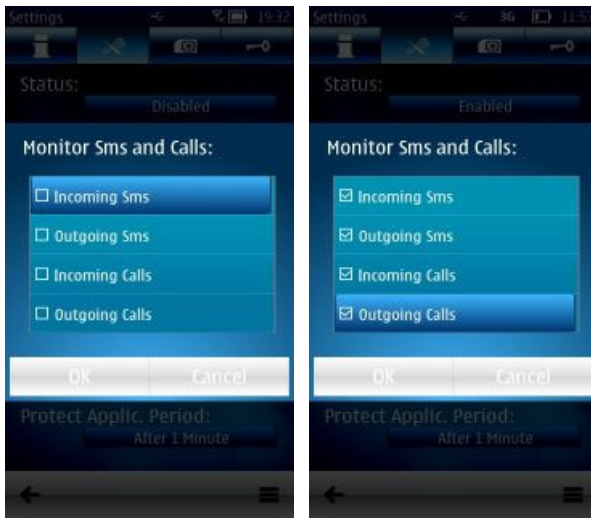

If you choose the “No” value, the phone will not be automatically locked.

If you choose the “On SIM Change” value, the phone will be locked when an unauthorized SIM card will be placed in the phone.

If you choose the “On Startup” value, the phone will be locked on every switch on and you’ll need to inset the correct Secret Code to use it.

In the Platinum and Iridium Editions you can also remotely lock the phone, using an sms command, for more informations, please read the pagraph “Lock or Unlock the Phone”

- “*Monitor Sms and Call*”, by enabling the Monitor, you can forward in real-time a copy for all the incoming/outgoing sms and a log for the incoming/outgoing calls.

For each incoming/outgoing sms, you’ll automatically receive a copy containing:

- Sender’s / Recipient’s telephone number
- Sender’s / Recipient’s name taken from the Contacts
- Sending / Receiving Date and Hour
- Text contained in the sms

For each incoming/outgoing call, you’ll automatically receive a log containing:

- Caller’s / Receiver’s telephone number
- Caller’s / Receiver’s name taken from the Contacts
- Hour and Date of the Call

Nota: All the informations are sent in realtime.

If the phone can’t send the sms, for example due to insufficient credit, the informations will not be sent.

- “*Protect Applic. Period*”, this parameters is used to avoid multiple Secret Code requests any time that you launch a Protected Application. Eg. If you set the “Protect. Applic. Period” to the value “After 1 Minute” the Secret Code will be requested only the first time that you launch a Protected Application and it will not be requested again until the phone remains inactive for at least 1 Minute.

In this way, you will not be forced to insert again and again the Secret Code when you use the phone.

Besides the various time values there are also two particular ones:

- “*Immediately*”, the secret code is required every time you start a protected application,
- “*Never*”, the secret code is required only the first time, after that it won’t be required any more till the next power down of the phone.

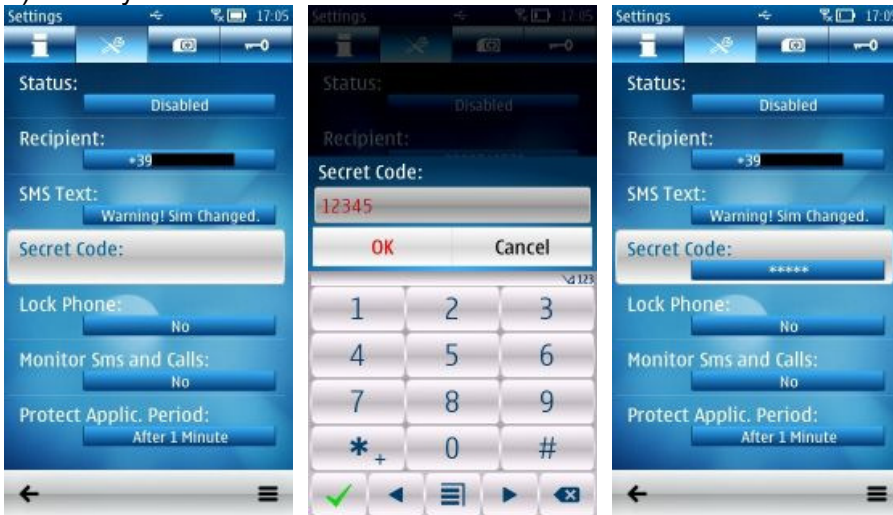

QUICK CONFIGURATION

To quickly configure your anti-theft follow below steps:

1) Go to parameter “*Recipient*”, select “*Options > Change*” and choose from the phonebook the recipient number of the notification sms “*SIM Changed*”.

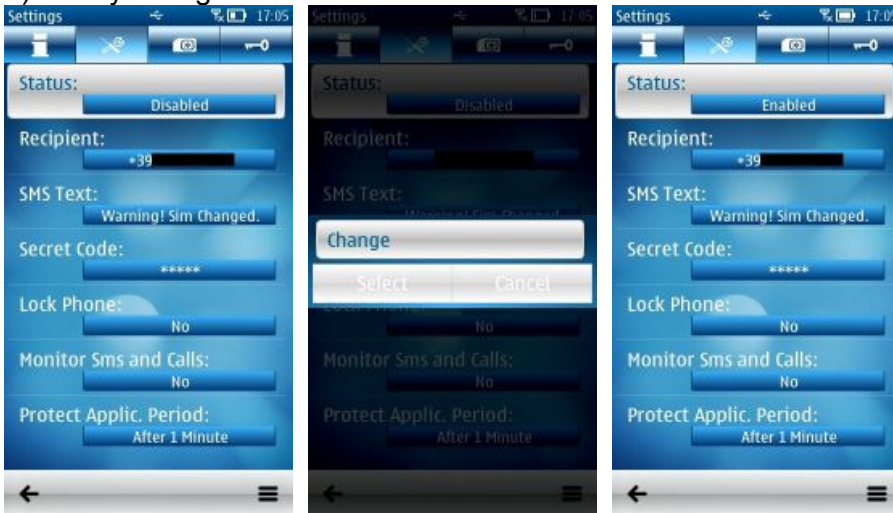

2) Insert your “*Secret Code*”.

Note: the secret code must contain at least 5 digits. It will be required when you enter in Guardian, in any “**protected application**” and to use “**remote control commands**”.

3) Finally change the “*Status*” of Guardian in “*Enabled*”.

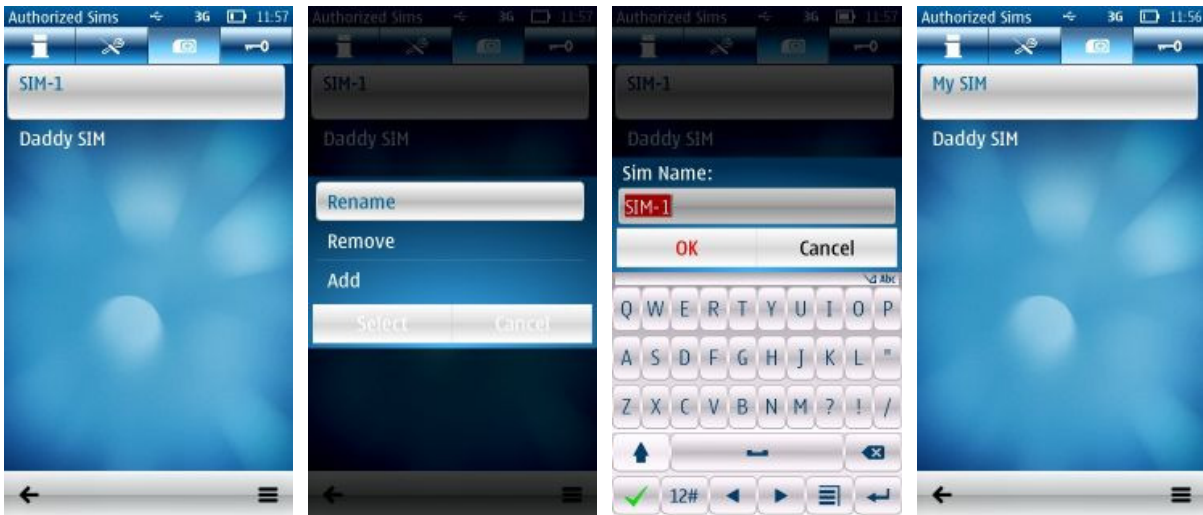

AUTHORIZED SIM LIST

All the sim present in this list are classified by Guardian as sim authorized to use the phone. The list is useful if you want to use your phone with different sim cards, in these cases Gardiant won't send any "Sim Changed" sms when you insert an Authorized SIM.

Note: the **Free** edition allow to have only the sim used to install the program in the Authorized SIM list.

Gold, Platinum and **Iridium** Editions can handle unlimited number of Authorized SIM-Cards.

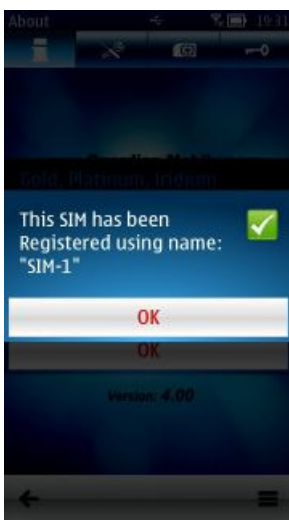

In this menu are present the following commands:

- "Rename", allows to modify the name of the selected sim
- "Remove", removes the selected sim from the list
- "Add", shows the instructions to add a new sim in the list

To add a new sim to the list:

- 1) Disable Guardian temporarily
- 2) Insert the new sim in the phone and power it up
- 3) Start Guardian and the new sim will be added to the list.

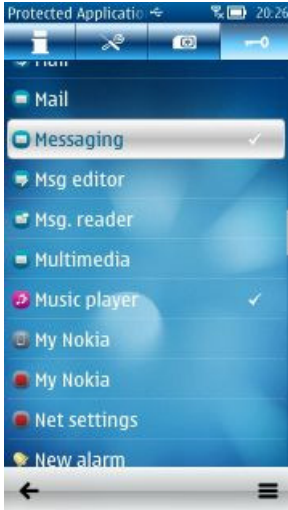

Note: You can add also a new sim without disabling the anti-theft, but Guardian will send a notification sms after the power up of the phone, because it will detect a unauthorized sim.

Suggestion: Use the option "Rename" to assign meaningful name to the various SIMs, so you can easier distinguish them.

PROTECTED APPLICATIONS

This view shows the list of all the application installed on the phone and you can select those ones that you want to protect. The protected applications are identified by a tick on the right of their name.

Note: It may seem that some applications are present more times in the list, but although the name is the same these applications are different and perform different functionalities, so if you don't know which is the difference between them just protect both of them.

In the menu you can find the following commands:

- **"Add / Remove"**: inserts or removes the selected application from the protected application list
- **"Large / Small icons"**: modify the icons size in the list

Suggestion: To prevent an unauthorized uninstall process, just protect the application: **"Installer"**. If someone tries to uninstall Guardian, the phone will ask to insert the *"secret code"*.

Suggestion: To defend your personal data you can protect the following applications

"Text Message"

"Messaging"

"Contacts"

"Calendar"

"Gallery"

"Log"

PURCHASE AND REGISTRATION

Whenever you can convert your **Free** edition to the **Gold**, **Platinum** or **Iridium** edition.

In this command menu the following options are present:

- “*Register*”, this menu allows to convert the **Free** edition to **Gold**, **Platinum** or **Iridium** after buying the product
- “*Buy*”, open the URL where you can buy the **Gold**, **Platinum**, or **Iridium** edition
- “*Send Guardian*”, allows to send the program to your friends via Bluetooth or Infrared (This option is not always available)
- “*Check updates*”, check if new program updates are available. If updates are available you will be able to download and install it on the phone immediately. We suggest checking periodically if new updates are available.

PURCHASE

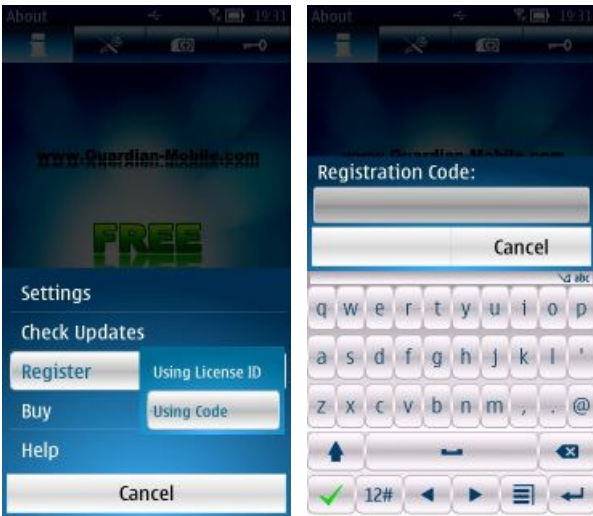

Once you complete the purchase procedure, you will receive immediately a personal Registration Code (on display phone and by email). You will have only to insert the Registration Code in the program to convert immediately the **Free** Edition to the **Gold**, **Platinum**, or **Iridium**.

To purchase the **Gold**, **Platinum** or **Iridium** Edition, visit the official website <http://www.Guardian-Mobile.com/> or select “*Options > Buy*” in the program menu to do it from your phone itself.

If you don't have a PayPal account, you can pay using your credit card (Visa, Mastercard, American Express, etc...)

REGISTRATION

After receiving the Registration Code, enter in Guardian, select the command menu “*Options > Register > Using Code*” insert the 8 characters code, which is case sensitive.

If you insert the correct Registration Code the software will be automatically converted to the purchased edition.

FAQ:

Using Guardian, can I protect with a secret code all my sms? And my phonebook? And the datebook? And...

Using Guardian, you can protect the access to the sms with your secret code; you can access to the sms only inserting the secret code when the application starts.

In general, you can protect the access to any desiderate application and to start it the phone will require your secret code.

Can I hide Guardian's icon from the menù?

Guardian doesn't allow you to hide its icon.

To hide Guardian's icon, or any other app's icon, you can use a software named IconHider:

<http://www.symbian-toys.com/iconhider.aspx>

How can I avoid a unauthorized uninstallation of Guardian?

You only need to insert the application "Installer" in the protected applications list. In this way, to remove Guardian will be required to insert the secret code.

I have protected an application, but sometimes when I start it I don't need to insert my Secret code.

This behavior is handled by the parameter "Settings > Protect Applications Period".

To avoid that phone requires the secret code anytime you try to use the application, they become free after the first time you insert the Secret code.

They will be protected again after a given time of phone inactivity.

Changing the parameter "Settings -> Protect Applications Period", you can modify the inactivity time, assigning the value that you prefer, and eventually set to "Immediately" so that the secret code will be required every time.

I forgot the secret code, how I can recover it?

Use the phone which you previously configured as recipient of the sim changed notification and send this sms to the phone where Guardian is currently installed:

LOSTCODE

Please note: if the sim in the phone protected by Guardian is authorized, then your secret code will be shown directly on display of the protected phone, while, if the sim is not authorized, you'll receive an sms containing your secret code.

Can I choose a recipient number not present in the phonebook?

If you want insert a number not present in the phonebook, you should create a temporary entry in the phonebook, use it in Guardian and then delete the entry. However Guardian will keep the selected number.

Can I get back deleted sms?

No, it's not possible. But, using Guardian **Iridium**, you can automatically receive a copy (on a second phone) for each sms sent and received, in this way, you'll be able to keep a copy for all the sms in your second phone, also in case that will be deleted from the original phone.
